

**Pineapple Guava ☼ 15' E Z8
Feijowa sellowiana Edible fruit**

**Pineapple Guava (Feijowa sellowiana) upright form - located in Madrona Bed Zones 8-10
Small evergreen tree Full sun Gray-green foliage Water regularly Waterwise Edible fruit
and flowers Acid, neutral, alkaline soil Low maintenance to 15'x15'**

Versatile, and easy to grow with an upright branching form, edible flowers, and tropical fruit! Fleshy white edible flower petals have showy red accents, contrasting nicely with the gray-green foliage. Tasty guava-like fruit ripens in late fall. Easily trained as espalier, a hedge, or a small specimen tree for landscape or container. Evergreen.

Evokes either a Mediterranean or tropical character in gardens. The coloring of this foliage complements western natives that have very pale, gray or hairy foliage.

The 1 to 1.5-inch flowers have curled petals with white undersides and fuchsia-pink topsides and a bouquet of up to 50 or more elongated 2 inch yellow-tipped bright red stamens at the center. Add to salads. Generally pest and disease free.
